## SUMMARY

---

Abass is an entrepreneur and aspiring full-stack developer, currently based in Kenya at KCA University as well as African Leadership University with a strong passion for full-stack development. Equipped with hands-on experience in various programming languages and technologies, I am driven by a desire to create innovative and user-centric solutions. Eager to leverage my skills and knowledge to contribute effectively to challenging projects and continue learning and growing in the field of software development.

Furthermore, Abass is driven by a mission to transform the educational landscape for refugees and IDPs in Kakuma. His goal is to develop applications that provide better access to educational opportunities, enabling refugee youths to realize their potential and build hopeful futures.
